Memory

HPE Standard Memory UDIMMs has passed the rigorous Hewlett Packard Enterprise qualification and testing processes. The memory subsystem in this server supports UDIMMs. The server supports single-rank and dual-rank DDR4 UDIMMs operating at up to 2133 MHz DIMM speeds.

Memory		
Population		
guidelines		

The server supports two channels per processor with two DIMMs per channel for a total of four DIMMs per DL20 Gen9 Server.

General Memory Population Rules and Guidelines:

- . Only UDIMMs are supported on DL20 Gen9. No support for RDIMMs and LRDIMMs
- . All the channels in a system run at the fastest common frequency
- . Both single DIMM per channel and dual DIMMs per channel are supported at 2133MHz
